Pc-CHECK® TESTS NEW AMD Athlon™ 64 X2 DUAL-CORE PROCESSOR

BOURNEMOUTH, England, May 31, 2005, Eurosoft (UK) Ltd., worldwide developers of computer diagnostic and test products, announced a new release of Pc-Check® to meet the release of the AMD Athlon™ 64 X2 dual-core processor. Eurosoft's latest Pc-Check version 6.00 includes new testing improvements to its advanced processor tests, with support for the new AMD Athlon 64 X2 dual-core processor. Pc-Check full-spectrum hardware analysis and component testing accommodates all types of computer systems – servers, desktops, notebooks and industrial-based computers.

"Pc-Check has been proving its testing value with our customers since the AMD Opteron™ processor release in April 2003. For today's release of the AMD Athlon 64 X2 dual-core processor, we are keeping pace with our customers' requests, adding support for multi processor systems, as well as FireWire controller tests. These new Pc-Check tests, along with the many other significant improvements in the 6.00 version, will continue to help reduce development and manufacturing cycles, while improving technical services," said Leslie Richards, Eurosoft's head office managing director.

Pc-Check now supports the new AMD Athlon 64 X2 dual-core processor, AMD Athlon 64 processor, AMD Opteron processor and previous AMD Athlon XP processors. Updated CPU testing includes the x-86 based AMD64 technology instruction set tests to examine the features in all modern processors. This gives manufacturers, integrators and resellers the latest industry-standard processor tests to fully validate processor functionality for multi-media applications. Other Pc-Check improvements include XML Hardware Identification allowing component comparisons in XML format during interactive and burn-in testing options. Compliant with desktops and servers, Pc-Check has reduced its memory footprint so it requires less memory to run, speeding up all testing processes.

"In line with Eurosoft's previous release of Pc-Check for the AMD Athlon 64 processor, we are hopeful that this new release of Pc-Check 6.00 to perform equally as well with the new AMD Athlon 64 X2 dual-core processor, said Bob Brewer, corporate vice president, Desktop Marketing Segment, Microprocessor Solutions Sector, AMD (NYSE: AMD). "Eurosoft's move to update Pc-Check for the AMD64 platform can help customers test and make the most of their AMD Athlon 64 X2 dual-core processor-based systems."
