

## U P G R A D E N E W S

**“What’s RIGHT about building PCs?”** A question solved each day, in every way when you use the world’s favorite production and testing software, *PC Builder Diagnostic and Test Management Software* from Eurosoft.

**“What’s new?”** You asked for automatic test data updating, improve internet data transfer, support for SQL databases, faster data archiving and easier archive data access, and improved WinPE test coverage. *Check out the list below for more details.*

**PC Builder is like no other diagnostic and process management software.** With over 30 million PCs built since 1995, PC Builder continues to keep manufacturing and configuration centers running smoothly. Oh, and just like our other diagnostic software, such as Pc-Check® Diagnostic Software, you’ll be pleased to know that all the testing methods and building processes of PC Builder are kept up-to-date year after year.

So, for as long as you keep your PC Builder license current, you’ll get the latest programs for super efficient, hardware testing and production processes. **Upgrades sent to you automatically for the duration of your PC Builder license!!**

*call us now to get the latest PC Builder release*

### NEW! PC Builder Features

- Enhanced QaPartsSetup
- Improved Internet data transfer
- NEW!! QaController 24-hour reset
- Enhanced database framework
- Enhanced QaAdmin module
- NEW!! Specialist script support for WinPE devices.
- Updated QaTest32 diagnostics

### The Benefits to You

- ...Automatically scan log files for missing components. Makes component entry into test database faster and easier.
- ...decreased data traffic between QaAdministrator and QaControllers by as much as 90%. Stops costly line upgrade.
- ...allows QaController connections to reset daily, updating the test data viewing automatically.
- ...PC Builder test management database framework now fully supports SQL, removing the need to use Access.
- ...QaAdmin module is now faster, with QaDataviewer providing improved data indexing, access and archiving.
- ...Eurosoft scripts for aiding building and injecting WinPE device drivers into PC Builder to fully test components such as modems, sound cards and audio.
- ...fully testing hardware: firewire controllers, CPUs: hyperthreading, multiple caches and multi-core. Also removable media: card readers and tape drives.
