Eurosoft to Demo Test Software at WinHEC 2005

WINHEC 2005—SEATTLE, WASH.—APRIL 25, 2005—Leading IT diagnostic software company, Eurosoft (UK) Ltd. announced its participation at the Windows Hardware Engineering Conference (WinHEC) in Seattle. WinHEC, is an annual forum – in its 14th year – that focuses on collaboration for hardware-related technical directions, design, standards, proposals and interoperability for the Windows platform. Eurosoft, with a new range of system diagnostic software for Microsoft's Windows Preinstallation Environment (Windows PE), joins the WinHEC seminars presenting alongside Microsoft.

On Tuesday, April 26th from 8:30-9:30am, Eurosoft will take part in the WinHEC seminar, *"Roadmaps for Best Practices - Building Support Solutions with Windows PE."* During this session, Microsoft will discuss the advantages of using the preinstall Windows PE for computer manufacturers and service organizations.

Eurosoft will present alongside Microsoft and discuss how customers can build and test PCs with the new Boot2Test UFD diagnostic test process using Microsoft's Windows PE to validate hardware reliability from a diverse range of PC hardware available worldwide. Eurosoft's Boot2Test unites Pc-Check and QA+Win32 core and device driven hardware tests with Windows PE.

"We are pleased to be working with Eurosoft to provide our customers with the tools and information they need to more effectively provide technical support of their PCs," said Mark Myers, senior program manager Windows division at Microsoft.

"Testing PCs reliably is a global, industry-wide issue that Eurosoft embraces fully with its range of system diagnostic software. We look forward to working together with Microsoft to help customers obtain the information they need to service and support PCs during manufacturing and in the channel." said Leslie Richards, managing director of Eurosoft (UK) Ltd.

pc reliability solutions

N E W S R E L E A S E

Eurosoft (UK) Ltd. is known worldwide for its well-established diagnostic and test management software technologies, Pc-Check, QA+Win32 and PC Builder, used in the manufacturing and servicing of a wide variety of PC based systems. PC Builder, the only PC manufacturer's scalable and remote assisted test management framework, already includes Microsoft's Windows PE.

Eurosoft offers best-practice hardware diagnostic software for preventing unnecessary repair and technical support of PCs. In addition to providing the latest diagnostics for manufacturing and service professionals, Eurosoft offers help desk support diagnostics, Virtual QA+ and Virtual Pc-Check, to reduce end-user technical support sessions. The new WMI developments enhance all of Eurosoft's diagnostics to support Microsoft customers.
