

Self-Booting Diagnostic Software to guarantee the highest levels of PC reliability

To stay ahead of the competition and provide the latest hardware devices and upgrades, PC manufacturing and servicing organisations need to ensure that new, serviced and upgraded PCs deliver the highest levels of performance and reliability. Pc-Check® provides easy-to-use, professional core hardware testing to maximise component reliability.

By ensuring that new, serviced and upgraded PCs leave the premises thoroughly tested and with guaranteed reliability, PC manufacturing and service organisations will reduce expensive support services and maximise their profitability.

Diagnostic tests for PCs should:

- ◆ Reduce assembly, upgrade and repair test workloads.
- ◆ Ensure reliably tested and validated PCs.
- ◆ Thoroughly test core components independent of operating system.
- ◆ Provide expert core testing to exercise the entire system's components.
- ◆ Reduce costly returns, RMAs and repairs by quickly and accurately determining hardware faults.
- ◆ Save wasted man-hours of system building, servicing and repairs.
- ◆ Ensure an independent test base to compare and validate vendor hardware information.

Pc-Check® saves time, money and resources by reducing assembly, upgrade and repair test workloads. Independent of operating systems, Pc-Check® determines hardware faults and reduces returns, RMAs and repairs and is the hardware testers' choice for original, self-booting diagnostic software.

The Eurosoft advantage

Since 1980, Eurosoft has had an enviable reputation as a world class provider of PC diagnostic and test solutions to leading manufacturers and service organisations. Eurosoft's widely-used PC reliability solutions have been proven in numerous manufacturing and servicing organisations to reduce costs and increase productivity throughout the entire PC lifecycle.

Technology innovation

The migration from Microsoft MS-DOS has had a major impact on PC Manufacturers, OEMs, ODMs and Service Organisations worldwide. Eurosoft continues to lead the way in cutting edge PC software and hardware testing with Pc-Check® — one of a complete suite of new diagnostic solutions that support tests with or without Microsoft's® Windows® Preinstallation Environment and Vista operating systems.

Saves time, money and resources

Used by thousands of PC manufacturing, repair, upgrade, education, and service organisations throughout the world, Pc-Check® is specifically designed to save time, money and resources by reducing assembly, upgrade and repair test workloads. Independent of operating systems, Pc-Check® determines hardware faults and reduces returns, RMAs and repairs.

For the latest test descriptions and technical specification, please contact Eurosoft directly or visit us at www.eurosoft-uk.com. More information on Eurosoft's diagnostics and Microsoft Windows Preinstallation Environment can be found at www.eurosoft-uk.com/testgoals.

Pc-Check® is the *de facto* testing solution for: PC manufacturing and servicing, distributors and resellers, IT training, corporate MIS and network administrators, and public and private sector organisations of all sizes.

Business benefits:

- ◆ Technical support included.
- ◆ Saves hundreds of wasted man-hours in fault testing during system building, servicing and repair.
- ◆ Cuts assembly, upgrade and repair test workloads.
- ◆ Improves service reliability and reduces costly returns, RMAs and repairs.

Technical highlights:

- ◆ Ensures that PCs are tested and validated accurately from configuration to core components.
- ◆ Unique Microtopology Memory Testing ensures maximum interrogation of every cell including heat and power-cycling testing.
- ◆ Original self-boot operating system to bypass installed OS for ease of use.
- ◆ RIS/PXE available with site license.
