

# QA+Win32™ with Windows Vista compatibility – now shipping!

For the past 27 years Eurosoft has taken the time to understand the needs and goals of its customers in order to develop and further enhance its already established computer diagnostic software. QA+Win32™ is a key component of Eurosoft's established suite of trusted diagnostic tools. No other Windows-based diagnostic has more years of testing behind it.

Over some 19 years, QA+Win32™ has become an essential tool for manufacturers to ensure that PCs are reliably tested and validated before they leave the factory, and when it is time for an upgrade or service QA+Win32™ is indispensable.

This latest release of QA+Win32™ will continue to keep system building and maintenance operations running smoothly – with Windows Vista compatibility QA+Win32™ offers greater support for testing multiple devices under the latest operating systems. Along with improved hard drive as well as advanced stress testing, this new release reaffirms QA+Win32™ as one of the world's leading Windows-based diagnostic products. Check out more of the excellent features and benefits below.

Reminder! Technical support is included with all your QA+Win32™ purchases and upgrades thereafter. Furthermore, QA+Win32™ upgrade features also apply to PC Builder QATest32 module.

Customers buying QA+Win32™ have also bought: Pc-Check®, PC Builder Test Management Suite™, ZeroData Hard Drive Eraser.

QA+Win32™ features	The benefits to you
New hard drive SMART tests	Identify test and validate SMART errors on the hard drives that are connected to a PC. Some vendor SMART implementations do not cause failures for drives which otherwise exhibit clear problems. Excessive fault detections will now fail irrespective of the disk's own reported SMART status
New Windows Vista compatible	Greater support for testing multiple devices under the latest operating systems
Enhanced stress testing	Now provides the ability to select a simple duration and includes tests for CPU, memory, hard disk and video to truly exercise the system and it's now easier to test them using WinPE
New memory testing	Eurosoft's famous microtopology algorithm has migrated to QA+
Enhanced processor testing	Detect and fully test CPUs including full support for hyperthreading multiple caches, dual and multi-core
New High Definition Audio tests	Intelligently configured audio tests ensure that all socket jacks will generate audio output so that speakers or headphones can easily be moved between them during testing.
New capture card test	Fully identify and test video or TV capture cards

If your diagnostics are out of date, don't wait! Call us now or visit our website to order the very latest QA+Win32™ upgrades, packs or site licenses
