computer reliability solutions

QA+Win32™ V9.2.1

Greater ability to test video capture equipment including Composite Video, S-Video, TV and RGB Capture tests.

Read on for more about new test updates!

For the past 27 years Eurosoft has taken the time to understand the needs and goals of its customers in order to develop and further enhance its already established computer diagnostic software. QA+Win32™ is a key component of Eurosoft's established suite of trusted diagnostic tools. No other windows based diagnostic has more years of testing behind it.

Over some 19 years, QA+Win32™ has become an essential tool for manufacturers to ensure that PCs are reliably tested and validated before they leave the factory, and when it is time for an upgrade or service QA+Win32™ is indispensable.

This latest release of QA+Win32™ will continue to keep system building and maintenance operations running smoothly – with Windows Vista compatibility QA+Win32™ offers greater support for testing multiple devices under the latest operating systems. Along with improved video capture tests as well as Biometric device testing, this new release reaffirms QA+Win32™ as one of the world's leading Windows-based diagnostic products. Check out more of the excellent features and benefits below.

Reminder! Technical support is included with all your QA+Win32™ purchases and upgrades thereafter. Furthermore, QA+Win32™ upgrade features also apply to PC Builder QATest32 module.

Customers buying QA+Win32™ have also bought: Pc-Check®, PC Builder Test Management Suite™, ZeroData Hard Drive Eraser.

QA+Win32™ features	The benefits to you
NEW Battery device testing	Perform charge, discharge, and stress tests on battery devices such as note book batteries.
NEW Biometric device testing	Tests the properties of security devices with known user supplied data such as a finger print.
Enhanced Optical device testing	Improved testing for CDROM and DVD ROM drives including a laser refocus test and ISO write testing.
Enhanced Video capture device testing	Greater ability to test video capture equipment including Composite Video, S-Video, TV and RGB Capture tests.
Enhanced Audio stress testing	Improved enumeration makes it possible to Detect and test more sound devices than before.
Enhanced Removable device testing	Identify and test a wider variety of removable devices more accurately.
