

Pc-Check® Windows® Computer Diagnostic Software

Pc-Check Windows provides an entire new set of tools and applications. Fully compatible with Windows 10 and UEFI hardware, components are reliably validated in the environment in which they are used.

Reliable hardware tests you can count on.

Developing intricate computer diagnostic software – because other hardware tests miss them completely – Pc-Check Windows is NEW and its indispensable. Count on a continued flow of reliable test results whether building, installing, supporting or servicing computers. Pc-Check Windows now offers greater support for testing multiple devices under the latest Microsoft operating systems.

Eurosoft has helped to find millions of computer failures since 1980. No exaggeration!

Pc-Check® Windows® features

Benefits for You

NEW support added for magnometers

Typically found in the latest tablet devices. Identified as compass devices, test for direction and component status.

NEW battery charge level test

Identify worn device batteries by testing the ability of a battery to charge and maintain power above the configured level.

NEW auto update feature

In program notification of new version releases, simply click on the update button to download the latest version.

Enhanced memory reporting

Test results for multiple memory channels individually displayed in reports.

Enhanced Monitor testing for multiple displays

Provides more detailed information for multiple attached displays. Including screen width and height in both inches and pixels and screen size in inches.

Latest Hardware Support

- Intel Skylake Pentium, Celeron and Core M3/5/7, Intel Broadwell-E
- AMD A10-7890K APU, AMD Bristol Ridge processors
- Support for Intel Kaby Lake
