

NEW...AND ENTICING!!!

Pc-Check® UEFI

Computer Diagnostic Software

Pc-Check UEFI provides an entire new set of tools and applications.

Unlike other so called “native” UEFI diagnostics, Pc-Check® UEFI diagnostics directly access and test essential components. No operating system in the way – no Linux, no Windows, no shell, no secure boot issues – **only UEFI testing in pure native mode.**

Developing intricate computer diagnostic software – because other hardware tests miss them completely – Pc-Check UEFI is NEW and its indispensable. Count on a continued flow of reliable test results whether building, installing, supporting or servicing computers. Pc-Check UEFI now offers greater support for testing multiple devices in a native 64bit UEFI environment.

Eurosoft has helped to find millions of computer failures since 1980. No exaggeration!

Pc-Check® UEFI features

Benefits for You

NEW fully-native pre-boot UEFI test environment

Test independently of the operating system **with secure boot enabled.** Direct, legacy free hardware testing regardless of brand or BIOS. No third party software such as Linux required.

Test all major hardware groups — pinpoint RAM failure

Determine hardware issues from software problems with direct-test access to all major PC components including all memory, hard drive and SSD, CPU and more without interference from the operating system.

Intuitive graphical user interface

Quickly and easily start testing the latest UEFI hardware. With exceptionally fast load times, you can be testing system in as little as twenty seconds.

Secure, Microsoft® signed boot loader

Proprietary UEFI boot loader enables testing with Secure Boot enabled. No need to install any security keys to the system. Protection against malware infection.

Unique dual-boot mode with Pc-Check® Windows®

Automatic integration with Pc-Check Windows. Provides powerful testing with and without the operating system to cover all your testing bases.
