

Pc-Check® MultiMode™

MultiMode option unites Pc-Check® UEFI (+ Arm®) with Pc-Check® Windows® to run together on a single USB... multiple test environments, with one unified report.

 **MultiMode** unifies your hardware testing, delivering Pc-Check UEFI + optional Arm® (64Bit) and Pc-Check Windows diagnostics, balancing the widest test cover with two environments, all as one smooth multi-session.

 Pc-Check UEFI is your answer to solving testing dilemmas outside the installed operating system. Whether Linux or Windows, Pc-Check UEFI **runs in native UEFI allowing direct access to PC (& Arm®) hardware.**

 Pc-Check Windows has a testing advantage with Windows-based computers. Fully **compatible with Windows 11** and UEFI hardware, booting WinPE, ensuring components are reliably validated in the environment in which they are used.

 Leverage Environments — **MultiMode** bolsters pre-boot testing with Pc-Check UEFI carrying results into full Windows running Pc-Check Windows multi-threaded stress testing with device driver support. Or start in flexible WinPE with Pc-Check Windows, launching into Pc-Check UEFI testing and back to Pc-Check Windows.

 Test Deeper — **MultiMode** gives you comprehensive testing, validating all components inside and outside of Windows.

 **MultiMode** combines the testing results of both test sessions into one combined report, your full diagnostic validation executed from multiple testing environments, all captured into a single report.

Unreliable testing of computers cost companies and technicians valuable time and money. Inaccurate test results impact operations, leading to more technical support calls, unnecessary rework, product returns and customer dissatisfaction. Proof of build and service has now become a requirement.

The latest Pc-Check UEFI + Arm is all you need to achieve fast, precise, pre-boot testing, for all kinds of PCs, systems and devices, plus the latest Pc-Check Windows is all you need to achieve the widest stress testing available, for all kinds of PCs, systems and devices, running WinPE or Windows — regardless of brand.

Run one in sequence with the other

MultiMode™ has the advantage of delivering balanced Pre-Boot + Windows-based tests to fully validate UEFI + Arm enabled components.

Fully UEFI hardware testing capable, Pc-Check® MultitMode balances time and testing. Pc-Check® UEFI + Arm® and Windows tools provide a dual-testing advantage, two tools on one USB, smoothly testing both inside and outside the operating system — informative results as one report. Unlike other so called “native” UEFI diagnostics, Pc-Check UEFI delivers **direct, legacy free hardware testing regardless of BIOS.** Pc-Check Windows sets the stress-testing scene ensuring Windows product readiness across all components.

Test the bare hardware, no driver intervention with native — UEFI and optional Arm.

Powerful testing under Microsoft® Windows® 11 (EOL 10).

Test UEFI enabled hardware in Windows®.

Combined UEFI + Arm & Windows testing.

Scripted or selected: Quick test, System Stress test and Burn-in test, Duration, any Number of passes.

Customize image settings by image type, region, more.

Unattended testing, launch scripts automatically, upon startup. Unlimited scripts.

Crand test PCs, including Intel-based Macs from self-booting WinPE media.

Verify Windows 11 Readiness for new and ITAD processing.

Custom grading, scores assets to your specification.

Autopilot detection reveals UEM enrollment to stop ITAD distribution of prior user connections.

Identify hardware faults quickly, saving hundreds of man-hours in fault testing.

Produce Proof-of-Service & Build reports to resolve customer doubts, increasing satisfaction.

➔ **Computer Test Accessories Details**

Pc-Check Test Accessories extends testing to your PC ports. Engineered to work directly with the diagnostics, the Pc-Check Test Accessories maximize reliability.

Unlimited Testing Excellent Test Scripts All-In-One USB

Testing summary

Pc-Check® MultiMode™ = UEFI + Arm® and Pc-Check® Windows® find hardware faults that other test products can't or won't reveal.

Giving you the latest tests supported by industry and customer challenges, you can count on the combined Pc-Check UEFI (+ Arm) and Pc-Check Windows to smooth test processes, reveal issues and validate reliability x86 UEFI PC and Arm hardware with state-of-the-art diagnostics that solve testing dilemmas.

One USB device, Two critical testing tools One united solution

Acclaimed Pc-Check UEFI (+ Arm option) and the successful Pc-Check Windows diagnostic software. All you need to achieve highly reliable hardware, using native-UEFI, stress and burn-in testing to reveal consequential and intermittent errors.

WinPE Image Creator application prepares custom, self-booting WinPE test media. Unlimited script and image builds.

Updates conveniently downloaded with Eurosoft's eTestManager.

Key Capabilities MultiMode

- ⇒ Bare-metal testing without drivers
- ⇒ Full memory validation
- ⇒ Automatically runs in native UEFI mode and Arm platforms
- ⇒ Works across all x86 brands
- ⇒ Arm auto-testing
- ⇒ Compatible with UEFI environments and legacy-free systems

Computer Test Features Summary

Test Feature Highlights

- ⇒ Advanced diagnostics, two-way assessment
- ⇒ Run directly inside Windows, boot to UEFI or WinPE, boot to UEFI
- ⇒ Comprehensive 2-point test coverage
- ⇒ Unlimited scripts or choose manual testing modes
- ⇒ Combine testing reports for complete hardware validation
- ⇒ Detailed results to support warranties and audits
- ⇒ Pc-Check Self-boot not included

Test results & Reports

- Proof-of-Service reports with your brand, detail and prove your testing.
- Print or store, reports provide recordation of every test job.
- QR code and a description for easy scan access to present as an end user to a technician. A URL is all that's required to point the QR code to your website.

Failure: Solid State Drive, S.M.A.R.T. Immediate, Device 1

Ready to try test and data erasure tools that support your business?

Solutions for an ever changing landscape...

Computer manufacturing and system integrating rely on diagnostics to form standard test practices. Repair, services and support are blending with field technicians, backing MSP's who remotely manage all varieties of computers. Critical assessment of systems situated publicly: government, military, education, healthcare, as well as private verticals expect compliant, running systems. Refurbishing has taken off, extracting re-workable components to balance a broad eco-system, recycling where they can't. Everywhere, demand for reliably running PCs is required and expected.

Manufacturing and system integrating of all sizes, building new PCs of all kinds, use the PC Builder™ Test Management Suite and Pc-Check® diagnostic suite to validate hardware and configurations prior to investing time in loading operating system. Pc-Check UEFI Embedded during production adds essential remote testing before shipping.

Refurbishing for trade, re-manufacturing, repurposing, ITAD, and leasing PCs, use several tools. Portable Pc-Check® diagnostic suite and the PC Builder™ solution quickly and reliably validate inbound and outbound hardware assets for suitability of reuse, upgrading, re-imaging. Eurosoft's ZeroData™ Windows® storage drive erasure software is used in process or portably for secure and compliant data wiping.

Servicing has a wide commitment, bringing consumers and industry closer to the upgrading and repair process. The full Pc-Check® diagnostic suite brings portable testing with pre-boot options, multiple script creation, and recordation,

reaching a variety of diverse PC customers. ZeroData™ Windows® offers portability and security to safely wipe customer PCs anywhere.

Support involves personal and remotely available technical sessions. Break-fix callouts and in-store warranty review, preventative maintenance, and rapid diagnosis to remediate downtime. Each Pc-Check® hardware diagnostic program gives fast and flexible hardware assessment. ZeroData™ Windows® securely clears data ensuring a variety of global compliance.

Flexible user and licensing options to perfectly fit your costs and needs.

Eurosoft (UK) Ltd are dedicated to offering a variety of hardware diagnostic, test management and data erasure solutions as standalone packages, bundled with systems and services, as well as site licenses of all sizes. Commercially developed, and maintained to test and securely data wipe the widest range of PC-based hardware, regardless of brand. Whether you are responsible for 10, 1000 or 1million+ PCs or equally as many technicians, you won't find a more comprehensive collection of software tools to increase customer satisfaction and improve business operations.
