

Wipe all data from a hard drive...defeat the most sophisticated software or hardware recovery tools...permanently

When you use ZeroData™ erasing software prior to reassigning, recycling, or donating a drive...you can relax. ZeroData™ conveniently and safely removes sensitive or unwanted information from PC hard drives...and it exceeds government and corporate data destruction level specifications.

Quick and easy-to-use hard drive data elimination

- Self-booting with the CD or the drive itself...no operating system required
- Auto start-up for overnight processing
- Hard drive erasing viewer
- Select Security Levels – Professional...Corporate...Military
- Optional password protection prevents un-authorized deletion

Overwrite the master boot record... hidden partitions...locked areas... regardless of BIOS restrictions

- Unpredictable random passes
- block sophisticated data recovery techniques
- Non-linear path option
- Erases any drive...erase up to 16 drives at a time
- For RAID, SCSI, SSD, IDE, and CHS hard drives
- PXE boot with RIS option for network. Windows PE version available with PC Builder; provides automated drive erasure
- Erases drives of 2 Terra Byte capacity or more

Ensure the drive is completely clean...and data cannot be retrieved

- Printable HTML validation certificates Reports include user and PC identification
- Erase logs record what and how many passes were made
- Know erase dates and times, sector errors, and more
- Finish with a zeroing pass to prepare for a clean new installation

ZeroData™ supports API functions to obtain SMART status

- Reflect the SMART status of drives when the ZeroData™ is started
- Launch SMART self-tests
- Obtain SMART data – such hard disk temperature – from ATA-type drives.
- Provides options to perform a selftest as part of the erasure process.
