

## Pc-Check® v8.07

*Now ships on Eurosoft Program USB, enhanced license and activation method. Updated PCI devices, and reduced program size for booting on a wider variety of systems.*

*Pc-Check continues to provide the greatest test coverage possible, on the widest variety of legacy PC systems, in an OS free, self-booting environment.*

Eurosoft has helped users worldwide to find millions of computer failures since 1980. No exaggeration.

Developing intricate computer diagnostic software – because other hardware tests miss them completely – Eurosoft fulfils challenging testing needs for computer-based environments. Supporting computers built around Microsoft, AMD and Intel technologies, we determine missing, failed and perfect computer components – regardless of brand.

Pc-Check® gives you the confidence you need to validate working versus problematic hardware. Pc-Check® has more commercial years of professional users than any diagnostic software. Join our dedicated customers, from OEM to local service shop, ensuring reliable test results today.

Pc-Check® upgrades keep you up-to-date with the latest diagnostics and best case testing practices. You can count on a continued flow of reliable test results whether you are building, installing, supporting, servicing or refurbishing computers. Pc-Check® offers you greater support for testing multiple devices regardless of operating systems.

**Combine Pc-Check® and Pc-Check® UEFI for the ultimate bare metal testing solution for legacy and new UEFI based PCs all on a single USB stick.**

Pc-Check® features	The benefits to you
<b>NEW</b> Eurosoft Program Device	No need for multiple CDs, now supplied on a USB3 compatible program key increases test coverage and provides a handy location to save test reports.
<b>New</b> License and activation process.	No more activation codes, no need to create personalised media. Simply add the license file to your USB and get your testing up and running quicker.
<b>Enhanced</b> Start up behaviour	Reduced base memory foot print for booting on a wider variety of systems increasing your test coverage.
<b>Enhanced</b> PCI device identification	Updates to the PCI Device and Vendor database makes it possible to identify and test more PCI devices than was previously possible.
