

## Pc-Check® v8.08

**Pc-Check continues to provide the greatest test coverage possible, on the widest variety of legacy PC systems, in an OS free, self-booting environment.** Pc-Check diagnostic software only tests the hardware you want it to. No gimmicks, no files touched, no brand names considered — just reliable hardware test results.

**Developing intricate computer diagnostic software – because other hardware tests miss them completely** – Pc-Check® gives you the confidence you need to validate working versus problematic hardware. Pc-Check® has more commercial years of professional users than any diagnostic software. Join our dedicated customers, from OEM to local service shop, ensuring reliable test results today.

*Eurosoft has helped to find millions of computer failures since 1980. No exaggeration!*

Pc-Check® upgrades keep you up-to-date with the latest diagnostics and best case testing practices. You can count on a continued flow of reliable test results whether you are building, installing, supporting, servicing or refurbishing computers.

**Original Pc-Check® Self-boot, included with Pc-Check UEFI, offers the ultimate 'bare-metal' testing solution. Combine with Pc-Check® Windows expanding your range of diagnostics to a perfect 3-point test plan.**

Pc-Check® features	The benefits to you
<b>Enhanced</b> PCI class identification	Identification expanded for new devices types including NVMe and better differentiation by interface type.
<b>Enhanced</b> stress testing	Test revised to include new technologies such as Intel UltraPath Interconnect and AMD Infinity Fabric.
<b>Enhanced</b> Start up behaviour	Reduced base memory foot print for booting and testing on a wider variety of systems increasing your test coverage.
<b>Enhanced</b> PCI device identification	Updates to the PCI Device and Vendor database makes it possible to identify and test more PCI devices than was previously possible.
<b>Enhanced</b> SMBIOS output	Now includes UUID information, making it easier to identify each specific machine tested.
<b>Enhanced</b> HD Audio controller testing	Improved display of connection levels allows more complex configurations to be tested.
