

Pc-Check® Windows® V3.5.3.0001

A short New Year polishing with a focus on CPU enhancements – Thermal Junction Maximum added. Scanning of larger hard drives – total size versus sector to speed things along. And, a tweak to the audio test – where audio endpoints may not prevail.

NOTICE: testing under Windows 7 is removed from this release, making room for the more current testing under Windows 10 and 11. Please let us know if you need this Windows 7 testing and we will update you. Please continue to use the online eTestManager to add program updates and license terms to each of your Eurosoft USB program devices. Contact the Support or Sales team for assistance.

Awsome reminders, only Eurosoft do these...

Test more memory than other Windows-based diagnostic tools – Unlimited DIMM reporting 512Gb (W8.1) to **1TB memory** (W10, 64Bit); and **2-Exabyte drives; 256 core CPU** packages, video, and UEFI enabled hardware.

1st place – Longest running diagnostic company – 40+ years – with spectacular results from the first-on-the-scene **Microtopology** memory testing, and our original 'self-boot' capability in 1986!

Pc-Check® Windows® features

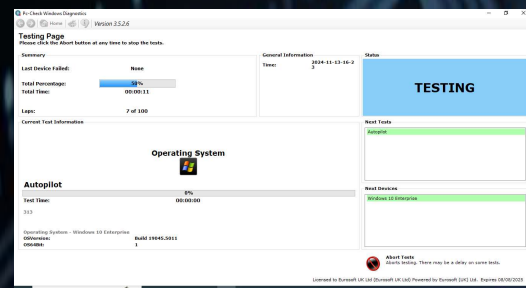

Benefits for You

Enhanced Intelligent scan test	Now testing by total hard drive size instead of sectors. Provides greater compatibility with bigger hard drives that use larger 4k sectors.
Enhanced Processor testing	Support added to identify the processor Thermal Junction Maximum, the temperature at which a processor will start to reduce performance to cool down.
Updated Processor testing parameters	Processor instruction set tests now have test parameter 1 Duration. By default this is set to 10 seconds to ensure the test are run quickly.
Updated Audio testing	In the event of a unit under test without audio endpoints (Line in, mic or line out) audio cards will still be enumerated, however tests will not available

Please contact us if you require 32bit Windows 7 testing options.

Previous Release Highlights

Autopilot Test	Easily determine if the unit under test has already been enrolled with Microsoft Autopilot.
Controller Group	Quickly identify and perform driver tests for RAID, Standard SATA AHCI, HD Audio, USB 3.0 eXtensible, Chipset Family USB Enhanced Host, Fixed and Wireless Network and Graphics
Windows 11 Compatibility Test	Confirms PC system/devices are ready for Microsoft Windows® 11 installation, as well as ensuring your chosen PC hardware meets system requirements before upgrading hardware
CPUID information	Improved support of AMD Strix Point (including GPU). AMD Granite Ridge/Strix Point memory p-states. Improved support of Intel Arrow Lake clock multiplier granularity. Intel Core Ultra 5 235, 225 & 225F (Arrow Lake). Intel Core i9 14901KE & 14901E, Core i7 14701KE, Core i5 14501E & 14401E/F (Raptor Lake).

Combine Pc-Check® UEFI and original Pc-Check® Self-boot for the ultimate 'bare-metal' testing solution alongside Pc-Check® Windows®, expanding your range of diagnostics to a perfect 3-point test plan.

Developing intricate computer diagnostic software – *because other hardware tests miss them completely* – Pc-Check® Windows® is indispensable. Count on a continued flow of reliable test results whether building, installing, supporting or servicing computers. Pc-Check® Windows® offers the greatest support for testing a multitude of new or legacy devices both pre-boot WinPE or full Windows operating system.

Eurosoft has helped to find millions of computer failures since 1980. No exaggeration! Celebrating 40+ years — with success from our exceptional customers.

NOTE: *WinPE has reduced driver support limiting its test function. The full Windows operating system is required for certain device driven hardware.
